

Government of Pakistan
Planning Commission
Recruitment of Energy Advisor

After successfully emerging out of the macroeconomic crisis plaguing the country over the years, Pakistan has set itself the goal of joining the high-growth league in the medium-term by sustaining this high growth over the long-term. Towards this end, the Planning Commission wishes to benefit from the services of a competent professional in the field of energy at its senior management level.

Job Description

- Development of vision for the energy sector
- Development of policy framework for the overall development of integrated energy sector including the development plans for power, gas, oil, coal and other renewable energy resources i.e. wind, solar, photovoltaic, bio-mass etc.
- Forecasting the energy needs for the country for the next 5 and 25 years perspective and suggest ways and means to meet the requirement from various sources.
- To prepare energy budget for next 25 years which should include the available energy sources like the energy available from the public and private sector power plants, captive power plants etc.
- To develop pricing mechanism of energy in Btu basis by taking into consideration the socio economic situation of the country.
- To review the available human resources in the energy sector and identify future need of human resources development and suggest ways and means to overcome the shortage of trained and competent manpower.
- Study and make recommendation about cooperation in the energy sector and develop a mechanism for enhancing regional energy linkages.
- To suggest paradigm for diversification of energy supply sources including the possibility of increasing the share of indigenous energy resources like coal, hydro and gas in the energy mix.
